Chapter 17

GEOGRAPHICAL LISTING OF INSTALLATIONS AND UNITS

Some MAJCOMs-SOAs and large activities operate mail distribution systems independent of the Host Base, and receive direct consolidated container mail, bypassing the BITC. On installations where this occurs, the *dispatching* BITC must decide the activity to receive direct pouch service. Section C of this chapter lists organizations that provide independent distribution systems and includes the addressees that receive consolidated container mail. MAJCOMs-SOAs report changes to this list to SAF/AADQA, Wash DC 20330-1000.

Sections A and B of this chapter contain locations of major Air Force installations with organizations down to detachment level. Host base support organizations are in bold type. This provides easy reference for locating a number of support functions, i.e., Base Administration, Personnel (CBPO), Housing Referral, and other service activities. Base Information Transfer Centers (BITC), or the Base Administrative Communications Branch (DAAC), will find this useful for determining where to send consolidated containers when processing more than one piece of mail to one location. AFR 182-2 describes procedures for preparing consolidated containers.
