BUREAU OF AERONAUTICS
WASHINGTON 25, D.C.

AER-SE-21

SUMMARY REPORT ON FACILITIES
NAVAL AVIATION SHORE ESTABLISHMENTS

AS OF 1 ~~AUGUST~~ 1949
November

ENCLOSED HERewith IS A COMPLETE RUNOFF ON THE LOOSE LEAF PUBLICATION "SUMMARY REPORT ON FACILITIES, NAVAL AVIATION SHORE ESTABLISHMENTS". THE LATEST SINCE THE REPORT DATED 1 MAY 1949.

THIS REPORT DOES NOT CONTAIN STATIONS REPORTED "INACTIVE" OR "DISESTABLISHED" BY CHIEF OF NAVAL OPERATIONS' AIR LOGISTIC DIRECTIVES.

IT IS REQUESTED THAT ANY CHANGES OF ADDRESS (DELETIONS OR ADDITIONS) TO DISTRIBUTION LIST BE REFERRED TO THE BUREAU OF AERONAUTICS, ATTENTION SE-21, OR PHONE MISS GLASS ON EXTENSION 5440

AIR STATIONS BRANCH - SHORE ESTABLISHMENTS DIVISION - BUAER

SUMMARY REPORT ON FACILITIES
NAVAL AVIATION SHORE ESTABLISHMENTS

DEFINITIONS AND NOTES

GENERAL

~~CONFIDENTIAL~~

NAVAL AIR BASES COMMAND	Under the Commandant of a Naval District, comprises, in general, all Naval and Marine Corps aviation shore activities in the district which furnish facilities for the operation of aircraft. Certain activities are excluded, such as the Marine Corps activities in the Fifth Naval District which are included in the Marine Corps Air Bases Command, Cherry Point, and the Training Stations which are assigned to the various Training Commands.
NAS - NAVAL AIR STATION	An independent activity which provides aircraft operating, testing, overhaul, training and personnel facilities, in accordance with the requirements of the Naval Aeronautics Organization.
MCAS - MARINE CORPS AIR STATION	In accordance with the requirements of the Marine Corps in the Naval Aeronautics Organization, provides facilities similar in character to those provided by a Naval Air Station.
NAAS - NAVAL AUXILIARY AIR STATION	An activity which provides facilities similar to those provided by an Air Station and which aids or assists a parent Air Station in accordance with organizational requirements.
NAF - NAVAL AIR FACILITY	An activity established to meet some special requirements of the Naval Aeronautics Organization and which may or may not be administratively dependent upon a parent (air or non-air) activity, in accordance with organizational requirements.
NAMC - NAVAL AIR MATERIAL CENTER	Provides facilities for manufacture, modification, and testing of aircraft, aircraft engines, and aeronautical parts; facilities for research and experimentation; facilities for flight operations.
NAMTC - NAVAL AIR MISSILE TEST CENTER	A station for testing and evaluation of guided missiles and their components.
NATTU - NAVAL AIR TECHNICAL TRAINING CENTER	Consists of Naval Air Training Schools together with other technical aviation training activities, the whole forming a composite command under the Chief of Naval Air Technical Training. Facilities are provided for the technical training of flight and ground crew personnel in accordance with the requirements of the Naval Aeronautical Organization.
NAOTS - NAVAL AVIATION ORDNANCE TEST STATION	Performs tests, modifications and developments of Aviation Ordnance.
NADS - NAVAL AIR DEVELOPMENT STATION	Performs development functions in the fields of aircraft electronics, pilotless aircraft, and aviation armament.

TYPE

L - Landplane runways or landing area available. S - Seaplane operating area available. Z - Lighter-than-air facilities available.

CNO REQUIREMENTS

The "Capacity Requirement for the Aviation Shore Establishments" issued by the Chief of Naval Operations on 3 May 1945, Op-31-D-MIG/AOL(SC)A21-1, Serial 0103211 was used in this report as the source of the data in the space headed "CNO Capacity Requirements". This directive represents the latest official program for the development of aviation shore facilities.

The definition of terms describing the status of Naval Aircraft Facilities as issued by the Chief of Naval Operations Op24/cj Serial 91P24, as of 17 March 1948 are as follows:

- A Active - An operating condition requiring facilities and personnel adequate to support planned operations and to maintain equipment in an operating condition.
- M Maintenance - A greatly reduced operating condition requiring minimum facilities and personnel to support emergency and itinerate operations; and to maintain equipment in an operating or preserved condition such that by addition of personnel "Active" status will result.
- I Inactive - A non-operating condition requiring only personnel necessary for fire protection and to maintain physical possession of the property involved.

The status of each independent station is listed in accordance with Chief of Naval Operations' Air Logistics Directives. All stations reported "inactive" by the Air Logistics Directives are deleted from this report as of date reported by the Directive.

OAR CLASSIFICATION

- Class A - Facilities are required for complete overhaul, repair, modification and test of aircraft, aircraft engines and all classes of aeronautical material.
- Class B - Facilities as required for complete overhaul, repair, modification and test of aircraft engines and accessories, but only for essential repairs to aircraft. Aircraft will not be overhauled in these departments. Instrument overhaul facilities will be provided only when directed by BuAer.
- Class C - Facilities as required for Maintenance only of aircraft and aircraft engines.
- Class D - Facilities as required for operation only of aircraft.

PERSONNEL FACILITIES

In general, the capacities shown for officer, enlisted and flight student quarters at a station are based on (1) Total Normal Capacity, (2) Total Wartime Overload Capacity, (3) Total Emergency Capacity. These capacities are based on the latest facilities reports (Navier 1792) received from the station and in accordance with Bureau of Aeronautics confidential letter Serial C-18705 dated 26 June 1945 to all Naval Aviation Shore Establishments. The capacities shown for officers' quarters include all warrant officers' quarters; and those shown for enlisted quarters include CPO quarters. Personnel capacities shown include Quonset Huts, Dallas Huts, UB's, Homoja and Green Housing where applicable. In certain instances, personnel capacities have included tents with wood floors located at stations where the climate was favorable to this type of housing. The personnel capacities shown do not include Navy quarters used ashore or defense housing units. Until form is redesigned, Total Design Capacity will be Total Normal Capacity; Total Overload Capacity will be Total Wartime Overload Capacity, and a fourth column, Total Emergency Capacity, will be added. Under II-B, OTHER QUARTERS, is the total of other quarters available to both Officers and Enlisted Personnel.

CONSTRUCTION CODE

Below is the code which will be used to show types of construction for foundations, walls, floors, roofing, and heating. These items must be coded in consecutive order as shown below:

- Code for Foundations

Piles bearing on soil	P
Concrete bearing on soil	C
Wood bearing on soil	W
- Code for Wall Construction

Concrete (include all masonry)	C
Metal	M
Wood	W
Structural Wall Board	B
- Code for Main Floor Construction

Concrete	C
Wood	W
Other	O
- Code for Roofing

Metal (galvanized tin, copper, etc.	M
Asphalt (include all built up-poured types)	A
Shingle (include other types such as slate, tile, asbestos, rolled, etc.)	S
- Code for Heating

Heated	H
Unheated	U
- Code for Projects Under or Pending Construction

Under Construction	*
Approved by SecNav but not yet under construction	**
Date of usable completion (June 1, 1945) 6 01 45	

The following code issued for special types of construction:

	Quonset	Dallas	UB Type	Homoja	Green	Tent (Wood Floors)
Heated	QQQQH	DDDDH	UBBHH	HHBHH	GGGGH	TTTTH
Unheated	QQQQU	DDDDU	UBBBU	HHBBU	GGGGU	TTTTU
