Foreword

UA26 A6 085 1945 D62

The Quarterly Inventory is issued for the purpose of presenting basic reference data on all War Department-owned, sponsored and leased facilities with the exception of certain projects of a secret nature. The inventory prepared by the Office of the Chief of Engineers*, is published quarterly as of 31 March, 30 June, 30 September and 31 December. Normally, the publication dates will be forty-five days following the end of the quarter.

To assure the maximum possible uniformity in methods of reporting, standard report forms, definitions, and instructions were prepared for use by the Services having accountability for the property involved. Such property falls into two principal groups: Command Facilities and Industrial Facilities. Different report forms were used for each of these two groups, and, except in one of the Summary Tables (Section I, part 3) data for these groups are presented separately in the tables. Copies of the reporting forms, together with related instructions and definitions are reproduced in the Appendix.

Methods of keeping records vary somewhat among the reporting organizations, and it was not found possible, in all cases, to follow uniform definitions and instructions. For example:

a. The nature of Army Air Forces' records of Industrial facilities makes it necessary for them to be reported on the basis of net committed costs.

b. The Technical Services' records of industrial facilities are on the basis of disbursed costs. It should also be noted that, in these records, installation and certain miscellaneous costs of production equipment are not related directly to specific items of equipment but are classified in total as "All Other Costs" for each facility. For the purposes of this inventory report, no such costs are dropped so long as any production equipment remains at the facility, but are dropped in total when all production machinery and equipment has been removed from the facility.

c. Defense Plant Corporation records are on the basis of disbursed costs but are compiled on a somewhat different basis of cost breakdown than are those of the War Department.

Accordingly, for Section III, Parts 1 and 2 have column headings under "Cost to Government" corresponding to the breakdown used in War Department records, while Parts 3 and 4 have column headings conforming to the D.P.C. breakdown. Data on total costs are, of course, comparable regardless of intermediate cost breakdowns, and none of the factors making for lack of uniformity in this inventory are felt to be of sufficient importance to affect seriously the comparability of the data on total costs of the various types of property. The above differences in cost breakdown methods account for the fact that in Section I, "Summaries", only total costs are used in the tables covering Industrial Facilities, whereas a breakdown into Land Costs and Construction Costs is possible in the summaries for Command Facilities.

The housing capacity figures shown in this publication represent "overall" capacity and, therefore, are not directly comparable to corresponding data shown in Section 15 of the Monthly Progress Report, ASF, since the latter report includes only "available" capacity. The terms "overall" and "available" are defined in War Department Circular 321 (1944). Similarly, the amount of storage space shown in this publication is "all inclusive" and exceeds the amount of such space shown in Section 2H, Monthly Progress Report, ASF. The latter is used as an operating report on "Depot Operating Space" and as such does not include "Troop Storage" and "Service Storage" nor does it include ASF and AAF installations.

Data on leases applying to Defense Plant Corporation facilities are not complete and this fact should be kept in mind by those using the summaries and the totals appearing in the detailed tables. The Defense Plant Corporation is currently engaged in compiling complete information on such leases.

The major categories under which the property is classified are indicated in the "Table of Contents. Summaries appear in Section I, whereas the other Sections, except for the Appendix, list each individual property involved. In each category will be found basic physical and cost data pertinent to that category.

Generally, throughout the tables, Command Facilities are grouped according to the purposes for which the property is used. Industrial Facilities are grouped by types of financing, i.e., the financial arrangement under which the facility was installed. In the case of Industrial Facilities there are four major types of financing:

a. War Department Owned - Includes Industrial Facilities owned by War Department and financed with funds allotted to the War Department.

b. Emergency Plant Facilities Contracts - This form of contract was used primarily in 1940 - 1941. It provided for initial financing and ownership of the facilities by the contractor, with ultimate reimbursement by the Government and transfer of ownership to the Government upon termination of the contract, subject to the contractor's option to purchase the Government's interest.

c. Defense Plant Corporation Funds (With War Department Funds) - Facilities financed under this arrangement are those with respect to which the War Department, in addition to assuming contingent liability, has also paid or agreed to pay the Defense Plant Corporation part of the estimated cost of the project as soon as it is started.

d. Defense Plant Corporation Funds (With War Department Contingent Liability) - Facilities financed under this arrangement are of the type where the War Department has made no payments to the Defense Plant Corporation and the monetary liability is contingent upon the availability of funds in the future.

Industrial Facilities financed with D.P.C. funds are owned by the Defense Plant Corporation, a subsidiary of the Reconstruction Finance Corporation. Such facilities are either leased to the contractors (who generally have an option to purchase on termination) or are operated for the Defense Plant Corporation on a management contract basis. The D.P.C. facilities reported in this publication are limited to those for which the War Department has some liability. The liability varies with the individual projects*but in all cases the War Department agrees that if the Congress provides the funds, the Department after termination of the project will reimburse the Defense Plant Corporation for any net loss.

The main categories of War Department appropriations which have been used to finance Industrial Facilities are:

a. Expediting Production Funds - appropriated for the specific purpose of financing industrial facilities, including land, buildings and machinery. The funds are used for financing both War Department and Defense Plant Corporation owned facilities, and are allocated only with the specific approval of the Secretary or Under Secretary of War.

b. Defense Aid Funds - appropriated directly to the President under the 1st and 2nd Defense Aid Supplemental Appropriation Acts, and in turn were in part allocated to the War Department by the Office of the Lend-Lease Administration for the purpose of rendering aid to foreign governments to aid in the defense of the United States.

c. Ordnance Supply and Service Army Funds - appropriated to the Ordnance Department and are available for use in acquiring production machinery and equipment, either by the War Department or by Defense Plant Corporation.

Section III, Industrial Facilities, in this report has been broken down by categories of status as active, standby, excess, surplus and disposed of. Within these categories the installations are shown under the using service. However the "disposed of" category is not a part of the inventory as such and is not included in the state listing or the summary tables. The reporting of machine tools and production equipment in privately owned plants not leased by the War Department was discontinued by ASF Circular 17, 1946.

Suggestions which would increase the value of this publication are invited. Any errors or discrepancies should be called to the attention of the Chief of Engineers, in order that appropriate adjustments can be made in future editions.

* Pursuant to memorandum for the Chief of Engineers, 6 December 1943, subject: "Preparation of Quarterly Report on War Department Owned, Sponsored and Leased Facilities", from the Director of Industrial Demobilization, Office, Director of Materiel, Headquarters, Army Service Forces.

RESTRICTED

INSTRUCTIONS FOR PREPARATION OF QUARTERLY INVENTORY OF COMMAND INSTALLATIONS

GENERAL INSTRUCTIONS

1. Reports will be submitted for existing command facilities (as defined in War Department Circular No. 8, 1944) specified below:

   a. Government owned land/or structures.

   b. Leased property (except installations consisting primarily of office space such as Procurement District offices, etc.) where any one of the following apply:

      (1) The total annual rental exceeds $50,000.
      (2) A special purpose facility such as hotel, laundry, pier, etc., is involved, regardless of annual rental.
      (3) Government construction or alterations in excess of $40,000 have been performed, regardless of annual rental.
      (4) Separate installations where substantial acreage is involved regardless of annual rental (municipal airports, etc.).

2. Submission of reports will be inaugurated as new installations are activated and will continue until installations are actually disposed of (See Specific instructions for Line 12)

3. Reports will be prepared as of 31 March, 30 June, 30 September, 31 December, etc., and submitted to:

   Office of the Chief of Engineers
   Attention: Control Branch
   Recording Unnecessary
   21st Street & Virginia Ave., N.W.,
   Washington (25), D. C.

in order to reach that office on or before the tenth of the following month. Only one copy of the report will be submitted.

4. Complete reports will be prepared and submitted for each report period. In no event will negative reports be submitted.

5. In those instances where a single installation involves both industrial and command facilities, a report will be submitted covering the command facilities with appropriate note in "Remarks", line 12, relative to the industrial facilities.

6. AIR FORCES INSTALLATIONS - Auxiliary landing fields, bombing and gunnery ranges, radio range station sites, and other similar installations assigned to specific Army Air Fields, but not contiguous to the field to which assigned, will be reported on separate reports. The official name of the parent field will be used as the name of the installation, and the specific purpose (Auxiliary Field No. 3, Blank Auxiliary Field, Precision Bombing Range No. 17, Air to Ground Gunnery Range, No. 5, etc.) will be reported on line 3 of the report under "Type of Installation". Aviation easements or land acquired adjacent to air fields to provide for necessary glide angle clearance will be included in the reports and will be identified in the "Remarks" column (Line 12).

7. HARBOR DEFENSES -

   a. Forts, major seacoast battery positions, large fire control stations, and similar installations assigned to officially designated Harbor Defenses, will be reported on separate reports. In such cases, the official Name of the Harbor Defense will be used as Name of Installation on Line 1 (San Francisco Harbor Defenses, Delaware Harbor Defenses, etc.) and the name of the fort, battery position, or fire control station will be reported on Line 3 of the reports under "Type of Installation" (Fire Control Station No. 17, Fort Funston, etc.).

   b. Where there are numerous small scattered harbor defense positions, such as barrage balloon sites, gun emplacements, searchlight sites, troop detachments, etc., and it appears to be impractical to submit separate reports on each position, all positions may be consolidated into a single report.

8. DEFENSE COMMAND AREAS - Scattered facilities such as searchlight positions, radar sites, troop detachments, gun emplacements and similar tactical installations for the defense of specific areas (Defenses of Washington Area, Philadelphia Defense Area) will be reported in the same manner as Harbor Defenses, as set forth in paragraph 7 a or b above.

SPECIFIC INSTRUCTIONS

Date - Enter last date of quarter for which report is submitted.

Line 1 - Name of installation - Enter official name of installation (Fort Dix, Blackland Army Airfield).

Line 2 - Location - Enter City and State in which installation is located. Enter nearest City, Town or Post office address when not actually located in a city.

Line 3 - Type of installation - Enter 5 or 6 word description of actual use being made of the installation, e. g. Advance Twin Engine Flying Training School, Infantry Division Camp, Prisoner-of-War Camp, Medical Replacement Training Center, etc.

Line 4 - This line applies to Housing of Military Personnel - Enter under each type of housing for enlisted men the capacity on the basis prescribed in Section 5 War Dept. Circular No. 321 (1944)

Line 5 - Enter the number of hospital beds in each type of building shown for general hospitals. (NOTE: Permanent Buildings consist of old permanent Army-hospi converted hotels, or buildings constructed for ultimate use by the Veterans' Administration; Temporary Buildings include semi-permanent type construction. Type A construction, or mobilization type construction. number of beds listed should be the normal bed capacity as defined by instructions issued by the Surgeon General for reports submitted to that office)

Enter only the total number of beds for station hospitals.

Line 6 and 7 - These two lines apply to storage and depot installations, etc., primarily concerned with the storage, intransit storage and movement of Army supplies. (NOTE: For Army Service Forces installations the basis of reporting each type of space should be in accordance with instructions and method of reporting space on WD AGO Form No. 998. Gross area only for each type of storage will be required for warehouse space show breakdown for heated and unheated space.)

Line 8 and 9 - Enter here the appropriate information for Staging Areas and Ports of Embarkation. Spaces (c) and (d) on line 9 are to be used for reporting general warehousing and open storage space existing at other than storage installations, e. g. Training Camps.

Line 10 - Previous Use and Acres in Site - For "Acres in Site" enter the number of acres acquired in fee under "War Department Owned" and acreage leased to the Government in "Leased". Under "Number of Leases" enter the actual number of individual leases or contracts for use of land and/or buildings. Under (f) report the total annual rental paid under such leases. Note: in preparing this portion of the report, "War Department Owned" and "Leased" apply to the status of the land rather than the status of buildings and improvements which may have been placed on leased land by the Government. Under "Previous Use" enter predominant use made of property before it was purchased or leased by the Government.

Line 11 - Cost to Government - (Since 1 July 1940) Care should be exercised that costs submitted on separate reports for sub-installations will not be included in costs submitted for the major command installations to which the sub-installation is attached.

   a. Land: Enter actual cost of land acquired in fee by the Government.

   b. Construction: Report actual costs of buildings and other construction (if not available report latest estimated costs) where installations are completed. Do not include costs of construction in process.

Line 12 - Remarks - Enter here any remarks pertinent to information contained in the report, particularly data relative to the placing of installations or parts of installations in a standby, excess or surplus status. When installations have been actually disposed of as surplus property by sale, transfer to another government agency, etc., submission of reports may be discontinued.

W.D.,A.G.O. FORM NO. 817 * 25 MARCH 1944

*THIS FORM SUPERSEDES W.D.,A.G.O. FORMS 825 AND 826 WHICH WILL NOT BE USED AFTER RECEIPT OF REVISION.

(SEE REVERSE SIDE FOR INSTRUCTIONS)

APPENDIX SECTION VII UNCLASSIFIED

INSTRUCTIONS FOR PREPARATION OF QUARTERLY INVENTORY OF INDUSTRIAL FACILITIES

GENERAL INSTRUCTIONS

1. The purpose of this form, W.D.,A.G.O. 817 is to provide information on all government owned or leased land, buildings and equipment used for industrial purposes.

2. Each Technical Service will report on property for which it has property accountability. (Army Air Forces and Defense Plant Corporation are considered accountable services for the purpose of this report. Defense Plant Corporation will report only on those projects for which the War Department has a firm committment or contingent liability.)

3. A single form will be executed for each plant in which the reporting service has real or other property for which it is accountable. A property used primarily for storage of excess industrial equipment and/or materials will be considered a plant for the purposes of this report and the report, in these cases, will cover the costs of land, buildings and stored equipment but not of stored materials.

4. Reports will be prepared quarterly (as of 31 March, 30 June, 30 September and 31 December) and will be submitted in time to reach the Office of the Chief of Engineers by the 15th day thereafter. One copy of this form will be submitted by the Office of the Chief of each Technical Service to:

Office of the Chief of Engineers,
Attention: Control Branch
Recording Unnecessary
21st & Virginia Avenue, N. W.
Washington (25), D. C.

5. In those instances where a single installation involves both Industrial and Command Facilities, a separate report will be submitted covering the Industrial Facilities, with appropriate note in "Remarks". Those parts of an installation which may not be distinctly separable should be reported in the category most applicable.

SPECIFIC INSTRUCTIONS

In block at upper left hand corner of this form, entitled "Type of Financing" indicate by a cross or check mark which type(s) is applicable to the plant being reported. In the space so designated enter the last date of the quarter for which the report is submitted.

Line 1: Technical Service - Enter the accountable agency (Army Air Forces, Signal, Ordnance, QMC, Transportation, CWS, Engrs., or etc.).

Line 2: Plant Name - Enter the official name of the plant. If the plant was known formerly by a different name enter such name following the official name thus (formerly_____).

Line 3: Plant Location - Enter the Post Office address of the plant (city and state).

Line 4: Planner Number - For Defense Plant Corporation Projects only - not to be filled in by Army Air Forces or Technical Services.

Plant Operator - Enter the name of operator of plant if not indicated and evident in the plant name.

Line 5: Principal Product(s) in this plant - Enter the names of the principal current products of this plant. (Propellers, Ammonia, Engines, Rifles, etc.). If it is known that the plant is producing its principal product for another service or agency, note "for_____(service or agency)" after the name of the product.

Line 6: Land - Enter Government owned and leased acreage in the appropriate spaces, also enter total acreage. If no government owned or leased land is involved, enter - (dash) in appropriate spaces.

Number of Leases - Enter the number of leases involved in the leased acreage reported.

Annual Cost of Leases - Enter the annual cost to the Government of rental for leased acreage.

Note: - (Data on leases can be obtained by the accountable service from the Division Engineer of the Corps of Engineers in the area where the plant is located).

Line 7: Buildings - Enter Government owned and leased square footage in the appropriate spaces, also enter total square footage. If no government owned or leased buildings are involved, enter - (dash) in appropriate spaces.

Number of Leases - Enter the number of leases involved in the leased buildings reported.

Annual Cost of Leases - Enter the annual cost to the Government of rental for leased buildings.

Note: - See note under Line 6.

Line 8: Cost to Government - (Since 1 July 1940)

I. War Department Owned and Emergency Plant Facilities. Enter the actual cost of government owned land, buildings and construction, enter f.o.b. manufacturers' cost of all equipment (including office, cafeteria, first aid, etc.) and production machinery currently in the plant. Enter in "other-costs" the actual cost of installation, transportation, rehabilitation, rearrangement, perishable tools and fixtures provided under a facilities contract, miscellaneous minor items, and overhead and fees relating only to the facilities provided.

II. Defense Plant Corporation Projects with War Department Funds or Contingent Liability.

The data for this line will be taken from DPC Form No. DP 4, "Semi-Monthly Status Report", as follows:

WD AGO Form No. 817	DPC Form No. DP 4
Line 8, Space A	Schedule I, Col. (3) Net Committed
Line 8, Space B	Schedule II, Col. (3) Net Committed
Line 8, Space C	Schedules III & IV, Col. (3) Net Committed
Line 8, Space D	Schedule V, Col. (3) Net Committed
Line 8, Space E	Total Col. (3) Net Committed

Line 9: Remarks - When because of transfer or disposal, the accountable service no longer has any investment in a given plant, a final report so stating, will be prepared on this form and submitted as part of the next quarterly report. Where the property has been transferred to another Technical Service and will remain at this location, the final report will indicate the new accountable service.
