FOREWORD

The U.S. Air Force Installations Directory comprises installations owned, operated, jointly used or currently available for use by the U.S. Air Force outside continental U.S., which are active, inactive or on caretaker status.

The U.S. Air Force Installations Directory has been compiled from information developed in field surveys, reports on file in this headquarters, reports furnished by National Defense agencies, real property records, and station housing reports presently being submitted by the overseas commands in compliance with AFM 150-15A, dated 1 September 1950 and special request to all commands, Subject: "Status of Housing and Occupancy", dated 25 February 1951.

Attention is invited to the fact that information so received from different sources varies considerably. All available information has been used and data presented herein is considered the most recent and reliable that can be obtained.

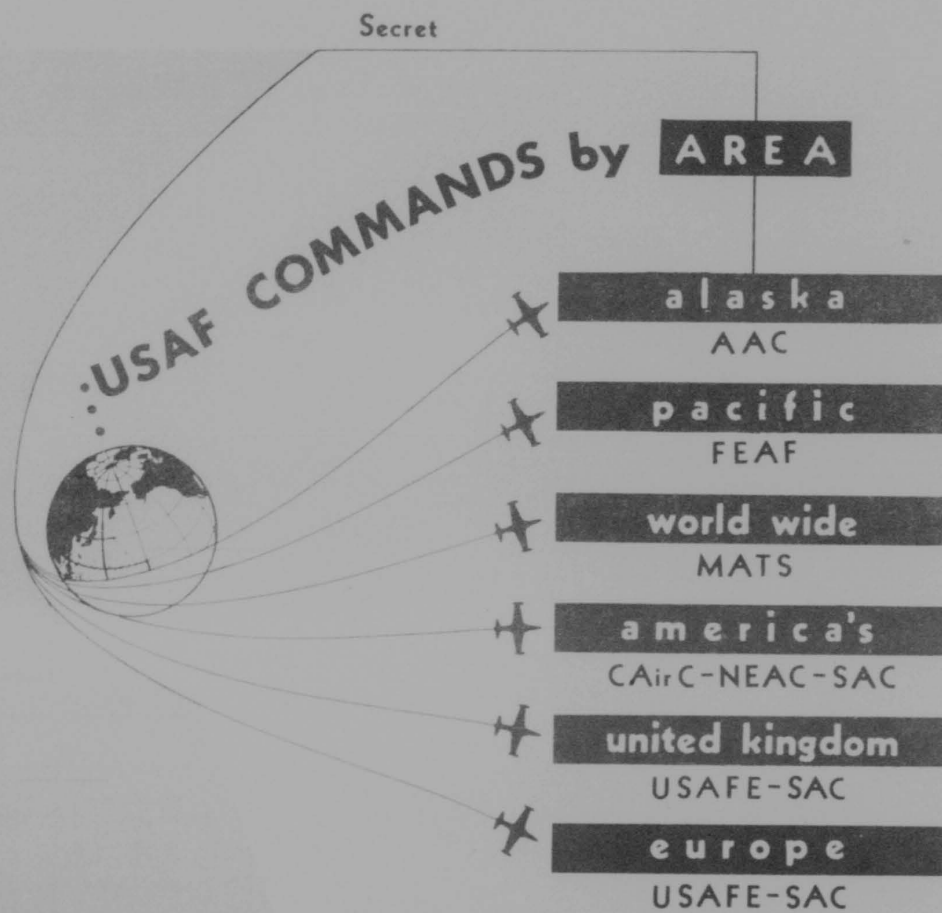

Installations in the Airfield section of the Directory are designated by Classification, Category and Status. Classification is in accordance with AFM 05-1, dated 19 December 1949, P, S and M indicating primary, secondary and minor USAF installations, O a U.S. Government installation other than Air Force and N a non-U.S. Government installation being utilized by USAF. Categories used herein, indicate the determination made by HQ USAF that an installation is eligible for: (1) Construction with 25 year life expectancy, an Installations Planning Board and FEMA sponsored housing; (2) Construction with 25 year life expectancy and an Installations Planning Board; (3) Construction with 25 year life expectancy; (4) Construction with 15 year life expectancy and an Installations Planning Board; (5) Construction with 15 year life expectancy; (6) No determination made. Installation Status is indicated by symbols A active and I inactive.

The 15 March 1946 issue, of the U.S. Air Force Installations Directory, is the master list of all Air Force installations outside the continental limits of the United States: used, constructed or improved for or by the USAF during the course of World War II, and should be retained for reference purposes.

In order that information contained herein may be kept currently accurate, it is requested that Page 58 of this directory be used to report corrections, additions or deletions.
